

ABSTRACT

Cosmetic composition comprising a particular ester, and
uses thereof

The invention relates to a composition
comprising a physiologically acceptable medium
containing a fatty phase comprising at least one ester
resulting from the reaction of a polyol with a
carboxylic acid of formula (I) below:

in which R₁, R₂ and R₃ are radicals independently chosen
from optionally functionalized alkyl, aryl and aralkyl
radicals, and combinations thereof.

The invention also relates to the use of an
ester of formula (I) above in a cosmetic composition
with staying power properties, especially of the
colour, and/or gloss and/or comfort and/or migration
resistance properties.
